OPTIMIZE YOUR SIDE DRESS OPERATION

Long Lasting Performance, Guaranteed Year After Year

BLU-JET's 7x7 Toolbar, Integrated Frame and Hitch Chassis, and Finite Element Analysis Design give our applicators the uncommon strength necessary to offer a five year frame warranty. Our row units are well known for their high acre use by custom application businesses.

AT4615™

Enhance Operating Efficiency, While Maintaining Soil Health

BLU-JET's in-house team of design engineers diligently match tank and tire sizes to minimize compaction. Single 380/90R46 tires make just one set of tracks per pass, while sufficiently supporting the load. Single Tires eliminate the risk of yield robbing pinch rows, which can occur with dual tire applicators, and significantly reduce the amount of crop run over during turn-around. BLU-JET's original Gull Wing Lift design provides built-in clearance on the ends, further diminishing the risk of crop damage. The 1775 gallon cone bottom tank centers the weight of the liquid on the axle, reduces slosh, and adds stability. The toolbar folds to match 40' planters as well, providing added value to customers.

Coulters Knife
Liquid Injection

Specifications:

Row spacings	23R30, 25R30, (76 cm) (31R22 (56 cm), 35R20 (51 cm)
Outer wings fold up for	17R30 or 40' (9,14 or 12,2 m)
Main Frame/A-Frame Hitch	Heavy Duty Integrated Welded Design
Cat IV Perfect Hitch	Standard
Heavy Duty 7 Section Toolbar	3 Section Double 7 x 7 Tubular plus (23 Coulters and up) 4 Sections Single 7 x 7
Automatic Hydraulic Gull Wing During Turns-Standard	
Wheels and Tires 120" (300 cm)	Radial 380/90R46 168A8
High Axle Clearance	30" (76 cm)
Cone Bottom Tank	1775 Gallons (6727 L.) with 3" (7,5 cm) Bottom Fill
John Blue Double Piston Pump	NGP-9055
Plumbing	Full Length 3/4" (1,9 cm) Parallel Manifold
Coulters	Super 1200 Coulters with 20" (51 cm) Smooth Blades
Overall Length	15'8" (4,81 m)
Transport Width	16'8" (5,08 m)
Transport Height	13'6" (4,12 m)
Empty Weight	23R30 13,100 lbs. (5945 kg) Standard
	25R30 13,600 lbs. (6174 kg)
Hitch Weight in Transport	4,000 lbs. (4086 kg)
Water Tank/Toolbox, Transport Chain & Jack, Lighting Kit, Standard	

Exclusive Jet Stream Row Unit with
high pressure direct injection or
coulter knife injection

Outer wing folds up for 17R30
(76 cm) operation

Easy access to 3" (76 mm) bottom
fill plumbing
