

GUNDOWN MAX™

Fast Working Defoaming Agent

GUNDOWN MAX is formulated to aggressively neutralize high-density foam in pesticide tank mixes, even where nitrogen-based adjuvants or fertilizers are used.

Features and Benefits

Unique formulation won't plug sprayer screens and nozzles like ordinary defoamers when used with Roundup WeatherMAX™.

Fifty percent stronger than ordinary defoamers, so it works in seconds to provide faster results with less product usage and saves you money.

Concentrated formula means you inventory less while getting a better value than with ordinary defoamers.

Can be used as either a defoamer or an antifoam on the toughest tank mixes.

Easy-to-use flip-top lid with 2 oz. dosing increments to prevent waste.

Packaging

Twelve one-quart containers.

Six one-gallon containers.

GUNDOWN MAX Use Rate Selection Guide

Method	Use rate per 100 gal. of solution	Recommendations
Antifoam	1 to 2 ounces	Add entire volume of GUNDOWN MAX needed for load when tank is ¼ full.
General defoamer	2 to 4 ounces	Add to spray solution at point of greatest agitation.
Spot defoaming	N/A	Apply by misting over established foam until desired results are achieved.
